Timings

Note: Timings for the pthreads was done on 11/23 and the mproc on 11/24; server load did not allow them to be done on the same day. Additionally, the pthreads version ran up to (or more than) 30 seconds faster when it was initially completed before the mproc, so this timing data will likely vary from yours if you run tests.

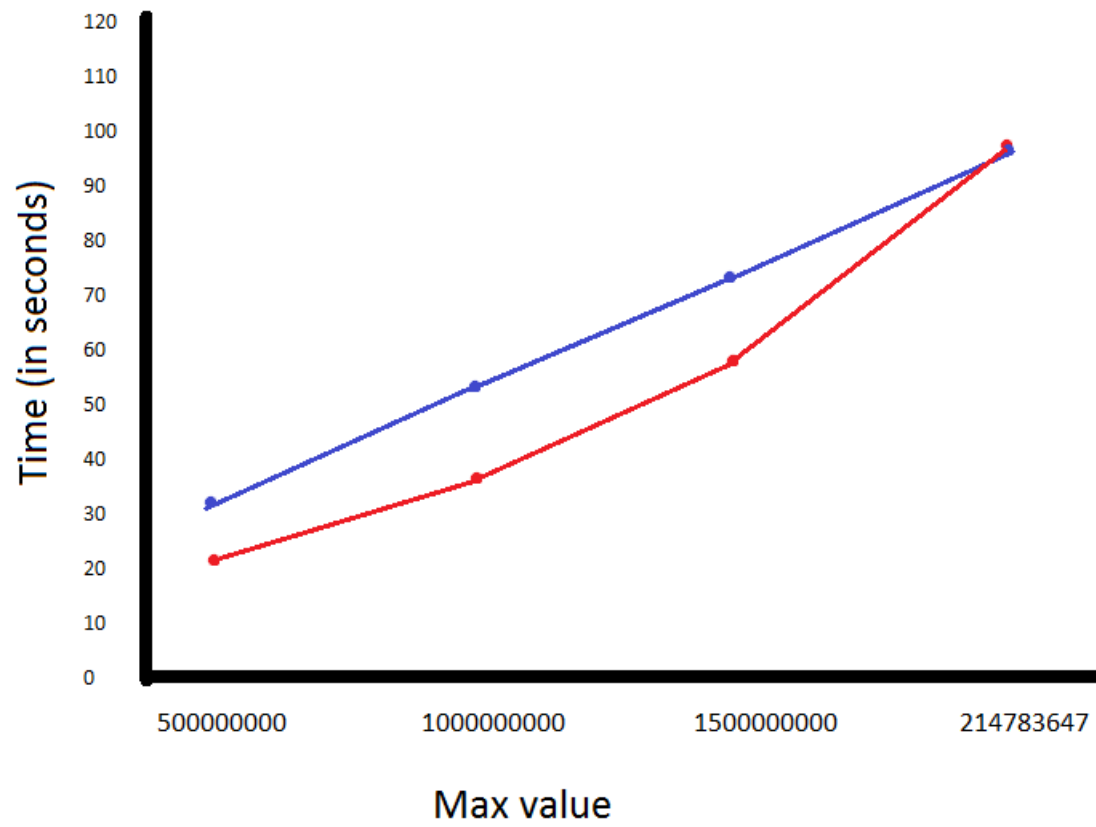

1 Process vs. 1 Thread

2 Processes vs 2 Threads

5 Processes vs. 5 Threads

10 Processes vs. 10 Threads
